Maine Center for Disease Control and Prevention Services Summary

Maine CDC

Behavioral Risk Surveillance System

The Behavioral Risk Surveillance System (BRFS) conducts an on going telephone survey, supported in all states by the U.S. Centers for Disease Control and Prevention to gather information on health behaviors of Maine citizens. The information is used to plan, implement, and evaluate programs in the Maine CDC. The data are also used by many other non-profit and private organizations to assess target populations, to provide benchmarks for evaluating activities, and to educate constituencies.

Maine Center for Disease Control and Prevention Services Summary

Maine CDC

Breast & Cervical Health Program

BCHP began as a five-year project September 29, 1994, funded by a cooperative agreement between U. S. Centers for Disease Control and Prevention and the Maine Department of Health and Human Services. The program was renewed for another five-year period beginning September 29, 1999. The BCHP is a program to improve early detection of breast and cervical cancer in Maine women. The cooperative agreement supports screening, referral, and follow-up services for low-income women over the age of 40; community-based health outreach and education programs; health professional education, quality assurance; disease surveillance; and evaluation.

The breast and cervical care providers are approximately 300 sites throughout the state of Maine that provide medical services on a fee-for-service basis through agreements and unencumbered contracts. The \$859,004 is estimated fee-for-service payments to be paid directly to the providers. This estimated amount is based on prior claims.

Cardiovascular Health Program

The Maine Cardiovascular Health Program works to prevent cardiovascular disease (heart disease, stroke, and other diseases of the blood vessels) by focusing on the population as a whole to address prevention. Reducing death, disability, and health care costs due to cardiovascular disease is targeted through interventions that address the major risk factors for these diseases-physical inactivity, poor nutrition, tobacco use, high blood pressure, and high cholesterol as well as the systems that address heart attack and stroke. Priority populations have been identified as groups at high risk for cardiovascular disease in Maine and include low socioeconomic rural populations, older women, Native Americans and persons with diabetes.

Maine CDC

Comprehensive Cancer Control Program

The CCCP is a five-year project, starting on September 29, 2002, funded by a cooperative agreement between the U.S. Centers for Disease Control and Prevention and the Maine Department of Health and Human Services. The CCCP works to reduce the burden of cancer by implementing Maine's cancer control plan. The cooperative agreement supports activities in detection, treatment, rehabilitation, survivorship, palliative and end-of life care as well as, cancer surveillance, evaluation and communications.

Maine CDC

Coordinated Care Service for Children with Special Health Needs Program

CSHN pays for subspecialty medical treatment for infants, children and adolescents ages birth through age 22. These services include diagnostic evaluations, office/clinic visits, inpatient/outpatient hospitalizations, medications, durable medical equipment, and other therapeutic interventions for the above referenced target populations who are uninsured for underinsured. To be eligible, participants must meet income and medical guidelines. CSHN also offers assistance with coordination of care, referral services to other programs, and education to families, regardless of income. CSHN services are community based, family focused, and culturally competent.

Maine CDC

Genetics Program

The Genetics Program assures comprehensive genetic services are available to individuals and families who have or are at risk for genetic conditions or birth defects. Comprehensive services include risk assessment, clinical and laboratory diagnosis, consultation, case management, referrals and education to providers and the public. Drs. Olshan and Morris provide medical consultation for the Newborn Screening Program. Kathryn Girardin provides audiology consultation to the ME Newborn Hearing Program.

Perinatal Outreach/Education: Maine Medical Center provides education and services to perinatal care providers throughout the state. This program will continue prior activities such as improving neonatal transports or prevention of premature birth, but will focus on providing education and technical support to areas in the state with limited perinatal resources. Technical support will be offered on a per request basis, through consultation and referrals.

Healthy Families Home Visiting Program

Seeking optimal health, development, and well being for mothers, fathers, families, pregnant women, infants, and children, Healthy Families Home Visiting offers all first-time families in Maine parent education and support by highly qualified home visitors. Home Visitors partner with families to build trusting relationships, to teach problem-solving skills, to improve the family's support systems, to develop advocacy skills both for themselves and their children, and to strengthen bonding and attachment process between parents and infants.

Visits are family-centered and individualized, with the family's input, to support and achieve each family's goals. Home visitors focus on the use of child development and attachment as a framework for supporting and promoting healthy family functioning and school readiness.

MCH Nutrition Program

The Maternal and Child Health (MCH) Nutrition Program promotes good nutrition and healthy lifestyles for Maine's MCH population. The program ensures that the MCH population has access to comprehensive nutrition services, which are culturally sensitive and scientifically sound. Eastern Maine Medical Center (the Diabetes, Endocrine and Nutrition Center) and Maine Medical Center provide statewide medical nutrition therapy to Maine adults, infants and children with inborn errors of metabolism who are not covered by a health care program or other resource.

Partnership for a Tobacco-Free Maine

The PTM is a comprehensive State tobacco prevention and control program supported by the U.S. Centers for Disease Control and the Tobacco Settlement Allocation. The goal of the PTM is to reduce death and disability due to tobacco use among Maine citizens. The PTM oversees a number of contracts for the delivery of program components, such as the multimedia and public awareness campaign, the Statewide Tobacco Treatment Initiative, the independent evaluation and the Youth Involvement and Leadership Initiative. In addition, the PTM provides financial and technical support to community agencies and schools to administer local prevention control techniques.

Maine CDC

Teen and Young Adult Program

Family Planning Services: Services for women and men of reproductive age are available statewide through over 29 local family planning clinic sites. Services include medical examinations, birth control, counseling and pregnancy testing. Family Life Education consultants provide consultation, education, and information to teachers, in order to assist schools to initiate a quality, age appropriate family life curriculum. Community Education and Outreach provides support to community-based organizations in 30 communities for teen pregnancy prevention activities.

School Based Health Centers: Schools and medical providers receive grants to increase the availability of health care for adolescents. Medical and social services are provided to adolescents on school sites. Some of these centers are connected to Healthy Maine Partnerships. A contract with the University of Southern Maine, Muskie School will provide some evaluation of the Mental Health piece of these services.

Tuberculosis Control Program

The Tuberculosis Control Program is responsible for TB disease surveillance and reports data monthly to the Centers for Disease Control and Prevention national reporting system. The TB Control Program provides case management for all TB disease suspect and cases and oversees screening of contacts of TB case and newly arriving refugees. The program contracts with (10) private physicians located throughout the state. The TB consultants run TB clinics for the diagnosis and treatment of TB disease and infection. They also provide ongoing consultation to physicians regarding the diagnosis and treatment of TB disease.

Gould Health Systems provides a computerized pharmacy system for costs of dispensing drugs to treat tuberculosis infection and disease. This system allows for tracking of clients and TB drugs and also provides a secondary surveillance system.
